

Improve Warehouse Processes

Package and Ship On Demand

Your cost structure is under pressure from greater SKU's, Omni channel demands, increased inbound and split cases, growing square footage, and the continued swell in demand for fast, accurate, and quality shipments.

Packaging and shipping with corrugated boxes made on-site, on demand improves order packing flow, decreases raw material and shipping costs, and mitigates the product from damage.

Reduce Operating Costs

- Virtually eliminate the use of void fill
- Gain warehouse space for revenue generating product

Improve Process Flow

- Exclusive cartonization software quickly calculates the smallest, optimum size box for the products to be shipped
- Optimize labor for packing at a line, batch packaging, inbound pre-boxing, pick to box, pick to cart

Increase Customer Loyalty

- Add contract value by demonstrating quantifiable shipping cost reduction by 10% to 20% or more.

A Box On Demand System will improve warehouse processes, promote your customer's positive reputation and cost structures, and increase your profitability.
